

WEST CORPORATETUBE

SHARE KNOWLEDGE ACROSS THE ENTERPRISE

Harness the power of video to boost productivity and reduce the cost of corporate communications and training.

Create a compelling content experience through dynamic video programs without sacrificing centralised governance and administrative control.

Employees are able to search and view as well as record and share content. Content is secure within your enterprise firewall. Maintain access control, approvals and other standards, while fostering greater productivity and a sense of community within your organisation.

Post webcasts recorded on the platform to designated channels in your CorporateTube portal in just one click.

IMPLEMENT CORPORATETUBE TO...

- Share your company's knowledge base
- Deliver training and education programs
- Support customer and employee relations
- Capture live events for future viewers
- Archive important policies and practices

BOOST PRODUCTIVITY BY...
