

CISCO WEBEX MEETINGS

SIMPLE, MODERN VIDEO MEETINGS FOR THE GLOBAL WORKFORCE

Collaborate and make faster, more informed decisions with Cisco Webex® Meetings, the trusted leader in video meetings for the global workforce. From the pocket to the boardroom, Webex Meetings lets users join meetings on any major browser or mobile or video device, so you can hold regular meetings with anyone—regardless of their location.

MEETING EFFECTIVELY IS A BUSINESS PRIORITY

Although the digital age has made it easier to connect across borders without the cost and hassle of travel, the human connection is still critical. Video has saturated every corner of our daily interactions, from social media to personal calls with friends and family. Strong businesses start with strong relationships. And strong relationships are forged on a foundation of strong communication. That's why Cisco Webex® Meetings puts video at the forefront of communication and collaboration to empower over 130 million people to put their best face forward.

With Cisco Webex Meetings, we're making it easier than ever for everyone to be seen, be heard, and work together effectively, even when they are miles apart. Anyone can join a meeting from inside or outside the organization, using mobile, desktop, video room devices (even a third-party device), or their browser. Everyone can enjoy consistent, easy meeting experiences and be fully engaged in the meeting, without technical complexity. Organizations need to implement solutions that remove the complexity of the video meeting experience—with crystal-clear audio and content sharing in the same meeting.

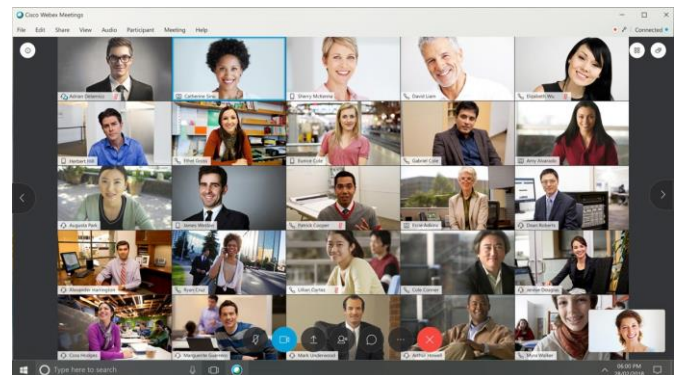

KEY FEATURES

Simple, video-first meetings with industry-leading video

Customize how you want to work and who you want to see in your meeting with multistream HD video. Add Cisco's award-winning video room and desk devices to your Webex meeting for lifelike experiences. Enjoy exceptional mobile meetings even while you're on the go.

Customizable layouts

Customize how you want to view your meeting with layout options, including active speaker plus seven participants. Choose a full-screen video layout with the ability to switch to a grid view that shows equal-sized windows for up to 25 video streams at once. Toggle back and forth between your content share and your video, depending on your meeting preference. Easily navigate your meeting with the centralized control bar for easy access to all your meeting controls. Lock and pin individual videos so that you can focus on the participant of your choosing and see their reactions. Chat privately or publicly with participants during a meeting, and monitor interest with real-time polls.

Document, application, and screen sharing

Share an application or your entire screen with remote attendees in real time. Attendees can take control and share content, or annotate yours. On the go, share your content or screen from your browser, Android devices, or iPhone or iPad. With the Webex desktop app, easily share your screen wirelessly via Proximity. Organizations can have a faster-moving, smarter, and more connected workforce by sharing files from the IBM Connections Cloud and Microsoft One Drive.

Personal rooms

Meet even faster in your own permanent, personal room. Schedule ahead or leave your room open, lock it, and easily admit people waiting in your lobby. If you are unavailable to attend your meeting, choose an alternate host to start and run the meeting in your personal room. Save time and join Cisco Webex meetings from your Cisco Webex Teams™ app, or easily continue your conversations in a Webex Teams™ space after your meeting ends.

Integrated audio

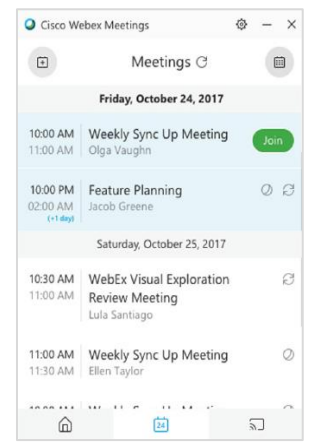

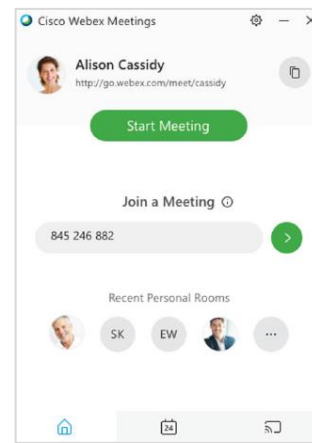

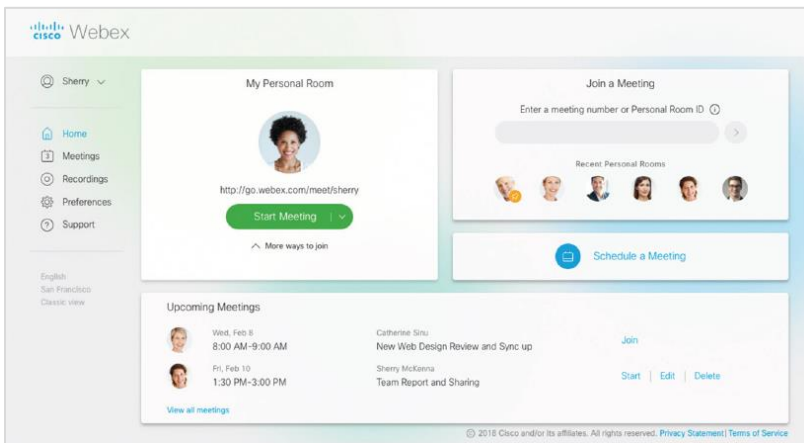

Offer an interactive meeting experience with integrated audio— available through West’s Cloud Connected Audio. Choose toll or toll-free, or call-in or callback. Alternatively, give attendees the option to connect using Voice over IP (VoIP) or your computer’s built-in audio. Wideband audio support using VoIP provides outstanding audio quality—even over low-bandwidth networks.

Call-me

Have your meeting call you. Simply enter your phone number or preferred video device when the meeting begins, and the meeting will call you—no dialing, no passcodes. Webex Meetings can also detect nearby proximity-enabled video systems (on-premises or cloud registered) and prepopulate those video addresses for easy access.

Simple, fast join and scheduling experiences

No downloads or plug-ins required, no dialing or fumbling with cords, codes, or integrations. Just one button to press—even on Cisco video room devices. Join from any device of your choice, including desktop, mobile, browser, third-party standards-based room devices, even Skype for Business. Have a consistent meeting experience no matter how you join. Get the simplest scheduling experience on the market today, even on your mobile devices. Schedule and join directly from your desktop for the fastest entrance into your meetings.

MOBILE OPTIMIZED

Exceptional mobile experience

Enjoy a rich meeting experience with audio, 720p video, and content sharing across Android, iPhone, iPad, Apple Watch, and Android wearables. For meeting participants on the go, Cisco and Apple are delivering industry-leading application, calling, and collaboration experiences for the modern enterprise, with new features in iOS 11, including tap to join, native screen sharing, and 3-D augmented reality file sharing. Sign in with Touch ID or Face ID on iPhone X and join your meetings faster with voice commands through Siri. Control your meetings easily with the MacBook Touch Bar.

Mute/unmute and background audio noise detection

Make meetings less distracting by muting yourself, and as a host you can mute specific participants or everyone. You can also mute or unmute your audio simultaneously from either your headset or your computer. Computer call-in users can experience fewer interruptions with Cisco Webex background noise detection that can identify noises such as typing, knocking, sirens, and dogs barking, and will prompt you to mute your microphone.

THE CISCO ADVANTAGE

Teams can meet, collaborate, and stay productive anywhere, anytime, and on any mobile device or video system. Cisco Webex video conferencing helps you make decisions faster, with integrated audio, video, and content sharing. Save time and money by relying on highly secure and scalable Cisco Webex Meetings from the cloud.

we connect. we deliver.
