

# CISCO WEBEX TRAINING

DELIVER RICH, INTERACTIVE TRAINING ANYWHERE

Broaden the reach and effectiveness of corporate training, higher education, or vocational school with online training from Cisco Webex® Training. Make it easy to deliver highly effective, live instruction to anyone, anywhere, without sacrificing effectiveness. Provide a dynamic, interactive learning environment and better manage audience participation. And extend the reach of your e-learning initiatives without adding staff or increasing travel budget.

Cisco Webex Training is an online training solution that can help overcome the instructional challenges of keeping online learners engaged during class and helping them retain the information afterward. Instructors can teach online more naturally using high-definition video for face-to-face interaction. They can enjoy clear audio, video, and data sharing, and use breakout sessions to create collaborative and individualized learning experiences that improve comprehension.

Whether you are an enterprise using Webex Training for corporate education or a university delivering online lectures, you will benefit from higher productivity and cost savings for vocational training, online lectures, tutoring, and group projects.

## Benefits for Enterprises

Improve competitiveness with ongoing training for worldwide employees, customers, and partners.

- Increase the reach of a geographically dispersed workforce, and save money at the same time.
- Increase market agility and customer responsiveness through just-in-time training.
- Gain competitive advantage through better-trained sales and support personnel, partners, and customers.
- Transform the training program into a profit center by generating revenue with e-commerce, and increase attendance with promotion codes.

## Benefits for Educational Organizations

Provide students with more options for elearning.

- Attract and retain students through more compelling online learning with live high-definition video.
- Help students achieve learning objectives through better classroom collaboration and communication with virtual breakout sessions.
- Evaluate training effectiveness with testing and polling, attendance reports, and attentiveness.
- Create a digital library of on-demand recorded lectures for future use.

## Benefits for IT

Count on Cisco for security, reliability, and performance.

- Reduce hardware, software, and maintenance costs.
- Get reliable, high-performance audio, video, and document sharing.
- Maintain data privacy with encrypted connections and stringent policy control.
- Take advantage of existing learning management system investments

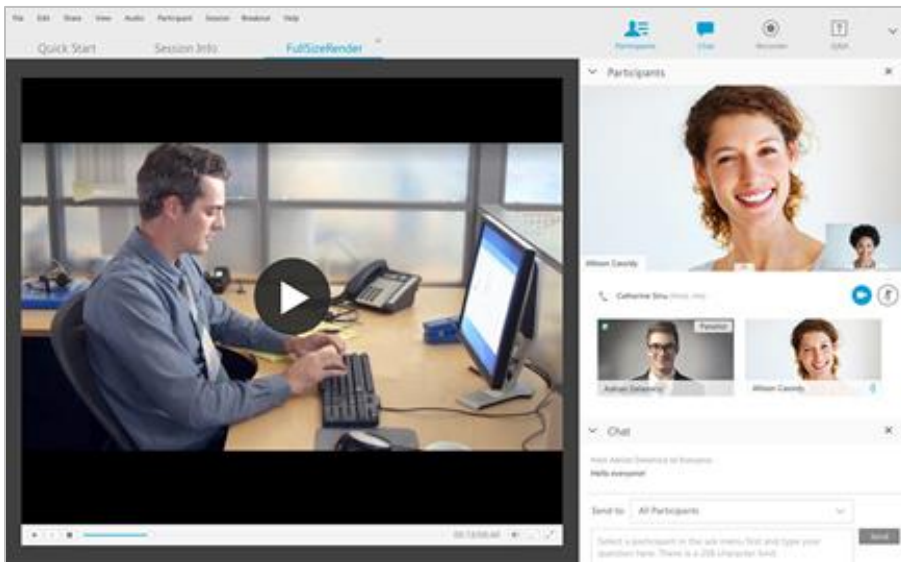

## Key Features

---

### Multimedia Sharing

Share Microsoft PowerPoint presentations, documents, streaming videos, demonstration software, whiteboards, and Adobe Flash animations. Pass sharing and annotation privileges to your learners to encourage participation. In addition, the multimedia experience supports third-party closed captioning services that offer streaming live text or a sign language interpreter video feed.

### High-Definition Video, Integrated Audio with Telephony, and Voice over IP Conferencing

Cisco Webex Training helps keep learners focused and interested with high-definition video of the presenter in the main session.

Full-screen mode provides a view of the active speaker in the main video panel, with up to six other participants displayed as thumbnails. The video experience includes Active Speaker, which switches the video automatically to focus on the current speaker. All participants also get clear, reliable audio through a telephone bridge or voice over IP (VoIP) and can join through callback or call in using a toll or toll-free number.

### Breakout Sessions

Assign participants to virtual breakout rooms for group projects and brainstorming. Then drop in on the breakout sessions to assess their progress and facilitate discussion. Students can share presentations and documents, whiteboards, and applications within their breakout sessions.

### Threaded Q&A

Track questions and document responses using threaded Q&A. Panelists can prioritize questions, display answers publicly or privately, or assign the Q&A to a colleague.

### Chat

Attendees can engage in private or public chat conversations with the instructor, another attendee, or the entire class.

### Polls, Attendee Feedback, and Attention Indicator

Collect feedback with one or more polls during a session, and instantly tabulate poll results to share with the class.

Participants can also “raise their hands”; the system automatically orders the requests so you can answer questions on a first-come, first-served basis. Gauge individual and overall group attentiveness at any point with a visual attention indicator.

### Hands-On Lab

The unique Hands-On Lab feature gives participants highly secure access to remote PCs for hands-on application learning and practice. Lab sessions can be conducted during live training sessions or on demand.

**we connect. we deliver.**

### Integrated Test Engine

Measure class performance by testing students before, during, or after live training sessions. Deliver a variety of test types, including multiple choice, true or false, fill in the blank, and essay. You can also take advantage of automated grading, reporting, and SCORM compliance, and store and reuse tests for other sessions.

### Recording and Playback

Capture and store session recordings for reuse and review using the integrated Network-Based Recording capability. Stream recordings within live sessions or post them for students to play back at their convenience. Recordings capture all aspects of the session, including audio, data, video, and annotations.

### Registration and Reporting

Simplify time-consuming administrative processes with self-scheduling, registration management, and attendance reporting. Access extensive reports about attendance, views of recorded classes, class attentiveness, test results, and more. In addition, you can schedule and launch sessions with a single click directly from Microsoft Outlook.

### Automated E-Commerce

Webex Training offers integrated e-commerce to help you easily monetize your live or recorded classes. You can set prices for each class; create, edit, and delete promotions; and configure credit card and currency payment options using U.S., U.K., and Canadian currencies. Webex Training is fully Payment Card Industry (PCI) compliant through an integration with PayPal. PayPal Payflow Pro and Website Payments Pro are supported right out of the box.

### Mobile Support

Enjoy a rich training experience with audio, video, and content sharing across Android, iPhone, and iPad devices.

### Single Sign-On

The single sign-on (SSO) feature enables three different levels of enhanced security for meetings:

1. Tag attendees on a participant list as SSO-authenticated by designating them as "Internal" or "Guest";
2. Force SSO to ensure that the only participants are those who have been authenticated via company sign-on; and
3. Set up invitation-only meetings with internal participants – no invitation forwarding allowed.

### Cross-Platform Support

Access Cisco Webex Training from almost any environment, including Microsoft Windows, Mac OS X, and Linux operating systems.

we connect. we deliver.
